VULNERABILITY ASSESSMENTS AND PENETRATION TESTING

VAPT PROCESS AND SYSTEMS

BOBBY SIMPSON

Bobby Simpson holds the position of Chief Information Officer at F&C. For over 17 years, Bobby has significantly contributed to transforming the realm of information security, enabling organizations to enhance the protection of their digital assets.

Bobby's core areas of expertise include:

- Information security & access control
- Digital asset management & privacy
- Vulnerability assessment & advising

Bobby's unique abilities and credentials:

- Trusted advisor and creator of GhostSentry, revolutionizing access control & compliance
- CISSP, GCIH, GCIA, GPEN, MCSE, and CCNA Security certifications
- Serves on the SANS Advisory board and InfraGard, showcasing his commitment to advancing the field on a broader scale

The Cybersecurity Challenge

Tribes and Tribal Gaming establishments face unique cybersecurity challenges, with potential cyber threats targeting your sensitive data and jeopardizing your operations.

F&C offers industry-specific Vulnerability Assessments and Penetration Testing (VAPT) services, tailored specifically to the needs of Tribal and Tribal Gaming organizations.

F&C Can Help

Our cybersecurity professionals have experience and expertise understanding the needs of the Tribes and Tribal Gaming operations. We understand the unique regulatory requirements and challenges you face, making us the ideal partner for your cybersecurity needs.

See page 2 for more info and contact details
